Professional Summary

Pursuing Master's in Computer Applications at the Techno India University, a Computer Science graduate with a B.Sc. (Hons) in Computer Science from the University of Calcutta. Skilled in Python, JavaScript, Node.js, Express.js, Django, MongoDB, SQL, and REST APIs. Experienced in building scalable web applications with authentication, database integration, API development, and responsive UI. Hands-on experience with Node.js and Django backends, along with local and web-based AI/ML integration. Strong foundation in Data Structures & Algorithms, OOP, DBMS, and Operating Systems, and System Design with a keen interest in software engineering and AI-driven applications.

Education

Techno India University

Masters in Computer Applications

Kolkata, West Bengal, India

December 2025 – April 2027

- *Currently Pursuing*
- Current GPA: 8.72 out of 10

University of Calcutta

Bachelors of Science in Computer Science (Hons.)

Kolkata, West Bengal, India

August 2022 – August 2025

- Degree GPA: 6.464 out of 10 (First Class)

WBBHSE: 80.6 %

February 2020

WBBSE: 60.4 %

February 2022

Technical Skills

Programming: Python | JavaScript | Java | SQL | C++

Backend & Deployment: FastAPI | Node.js | Express.js | Django | Docker

Tools & Version Control: Git | GitHub | Vercel | Postman

Machine Learning & Data Analytics: Scikit-learn | PyTorch | Pandas | NumPy

CS Fundamentals: Data Structures & Algorithms | OOP | DBMS | Operating Systems | System Design

Projects

City Business Discovery & Social Networking Platform

[GitHub](#)

- Built a full-stack **local city discovery platform-cum-Social Networking** using **Node.js, Express, MongoDB, EJS, and Leaflet**, focused on helping users decide **‘What can we do this evening?’** through local businesses, events, and activities.
- Developed a **social media module** for location-based user posts with images, reviews, and real-time city activity, alongside an **AI city assistant** providing context-aware recommendations from platform data.
- **Tech:** Node.js | Express | MongoDB | EJS | Leaflet | JavaScript | Bootstrap | Gemini | Ollama

Fraud Detection System using Machine Learning

[GitHub](#)

- Built a **fraud detection model** on highly imbalanced, large-scale transaction data (6M+ records) to identify suspicious financial activity and reduce fraud risk.
- Optimized the fraud alert decision threshold to achieve a **90% fraud detection rate** while improving precision from 25% to 33%, **reducing false alarms** and manual investigation workload.

Certificates

- **IBM** : Machine Learning for Data Science Projects | Issued Jul 2026
- **Cisco** : Data Science Essentials With Python | Issued Jul 2026
- **Cisco** : Introduction to Modern AI | Issued Jul 2026
- **Deloitte Australia** - Data Analytics Through Tableau Simulation | | Issued June 2026
